

How to succeed in CSC-210

Advice from former students

- Person 1: Always pay attention in class and do the homework
- Person 2: As long as you pay attention in class and do all of the homeworks correctly, they will easily prepare you for most of the tests
- Person 3: It takes a lot of trial and error to make a program so don't give up easily. The trial and error process helps you learn from your mistakes.
- Person 4: Take notes, especially when going over examples on the board and on the computer.

- Person 5: Go to office hours of the professor whenever you need it.
- Person 6: Don't zone out or get distracted by the computers
- Person 7: The HW prepares you for every test given
- Person 8: Be sure to show up to ALL classes and complete all homeworks, as the concepts build off of one another. Don't be afraid to ask questions.

- Person 9: Download Eclipse on your own computer to use at home / in dorm
- Person 10: Start the zyBooks questions (homeworks) ahead of time
